What if young Albert Einstein had a magical compass that inspired his theories of relativity?

In *Einstein's Compass: A YA Time Traveler Adventure*, a young Albert is given a supernatural compass that allows him to travel through time and space, and find wisdom in other dimensions, including the lost city of Atlantis. But evil forces seek the power of the compass, including a monstrous, shape-shifting dragon from a different age. Can the compass protect Albert from such villainy?

TESTIMONIALS

Einstein's Compass packs in a huge amount of detail and spans several different genres due to the time-traveling nature of Albert's compass. The historical elements were brought to life with fantastic descriptions and a lot of well-researched detail, even for the smallest of elements, and it's this attention to detail that makes the story so rich as a whole reading experience. Author duo Grace Blair and Laren Bright weave an intriguing plot that is disparate to begin with but comes together with a fantastic swell of energy towards the end and builds to a startling and brilliant conclusion. Overall, Einstein's Compass is a highly recommended story. **Reviewed by K.C. Finn for Readers' Favorite**

"Einstein's Compass exhibits a solid writing style and dutifully hits Einstein's developmental and educational milestones while weaving in an imaginative backstory and unique antagonists' perspectives. The *what if* of Albert Einstein developing his landmark scientific theories through the aid of spiritualism and time travel, all the while battling an immortal dragon-person from Atlantis, is certainly a unique concept." **Booklife Magazine a division of Publisher's Weekly**

"Albert Einstein was fascinated with time and space from an early age, but what inspired him? Receiving a magical compass from his father, Albert sets off on a journey to learn more than math and science offered to understand even time and space. Unfortunately, an ancient evil from the days of Atlantis also seeks his compass, and will stop at nothing to have it. Can the Agents of Light protect Albert from the shape-shifting dragon and help him achieve his destiny, or will he fall prey to the dangers of his day and lose the powerful device before he completes his mission? The combination of science with the supernatural is a winner, and the good vs. evil fight is interesting, making this a good book for YA readers." **Sarah E Bradley In'D Tale Magazine**

"a curiosity-arousing story with a well-crafted spiritual core carefully woven in with the threads of science, space, and time. There's plenty of world building and enough character intrigue to keep readers turning the pages. A fun fantasy adventure." – **Historical Novel Society**

Book Excerpt

There are only two ways
to live your life.
One is as though nothing is a miracle.
The other is as though everything is a miracle.
Albert Einstein

Albert dangled a brass object on a silver chain, Johann's eyes grew large. "Wow, what is that?"

"It's a compass. My father gave it to me. Have you ever seen one before?"

Albert closed his eyes and held his precious gift to his chest. "Oh, I love my compass, and I love my Papa, who gave it to me." The compass tingled against Albert's chest. From inside the compass, a shimmer of light burst then radiated out about ten inches all around Albert's hand. Albert felt the unexpected warmth and opened his eyes to find a rainbow projecting from the gems. Above the compass floated a three-dimensional number 33. Johann, struck with wonder, squealed, "Look at that!"

Interview Questions

1. What was your inspiration for writing Einstein's Compass a YA Time Traveler Adventure?

I have always thought of Einstein as a fascinating person. He lived during the horse and buggy days where the light bulb was the most advanced technology. So how did he come up with his miracle theory given the circumstances of his life? So, I asked myself the what if question.

What will happen if? Albert was a modern mystic in his time.

What will happen if? Einstein was a star child from Atlantis?

What will happen if? Albert was trying to remember what he did as a priest-scientist during his lifetime in Atlantis.

What kind of place was Atlantis? Who lived there? What were the people like in Atlantis? Maybe in Atlantis, he had an evil twin brother.

Maybe there was an advanced civilization in Atlantis.

2. How did you choose the title?

Young Albert received a compass from his father when he was a boy, which gave him the inspired vision to discover his miracle theory. The compass and his quest made me create the title and a compass that was more than a direction finder instead a vehicle of the supernatural, which Albert uses to discover his world-changing theory.

3. What scene, in the book, are you most proud?

Prolog is one of the most famous scenes as it is the foundation of the story. The completed chapter with historical research into Atlantis, Egypt, and Jerusalem, setting with the conflicts of people, dragons, and spiritual realms was a proud moment
